# Contained in 30

**October  
2017**

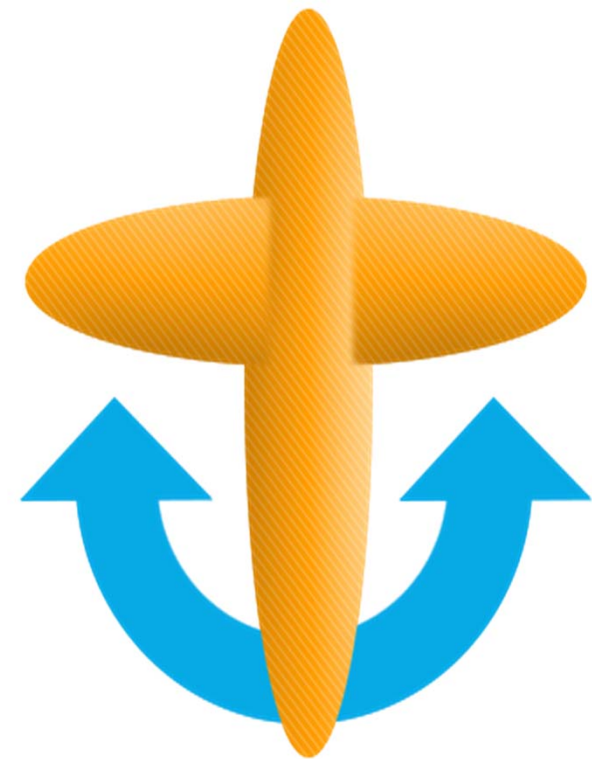

Preventing disastrous consequences of oil spills, instantly.

# Lightest boom in the world

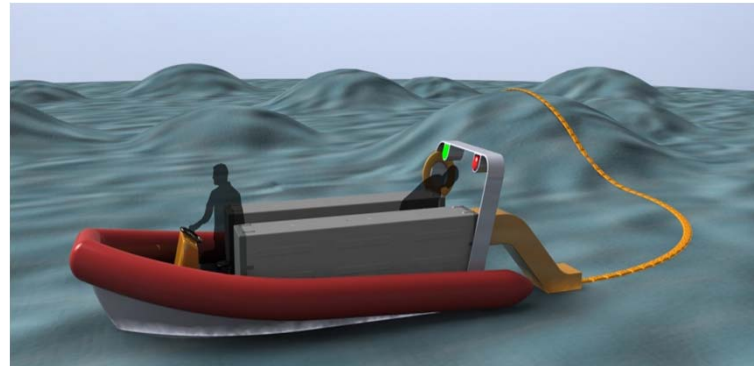

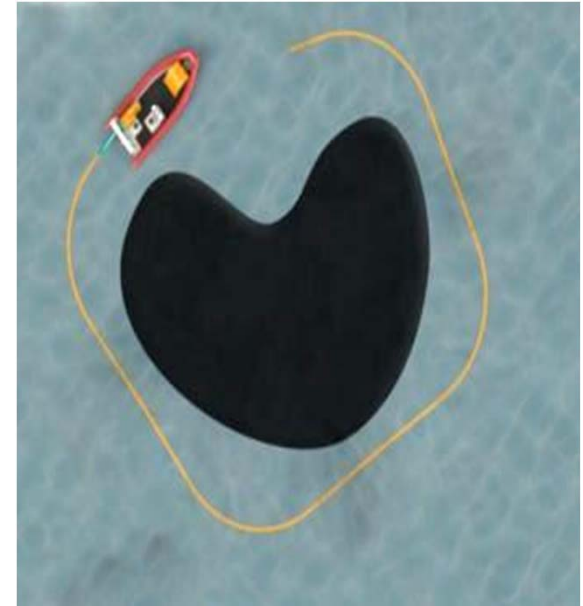

- Revolutionary geometry
- Optimized for wind, currents and waves
- 600 g/meter
- Weighs 1/15th of traditional boom
- Fraction of the storage space
- Disposable and Recyclable

# Immediate oil spill containment system

- Size of a lifeboat
- 1000m of boom, deployed immediately
- Preinstalled anywhere a spill can occur (ports, shores, rigs, tankers...)
- Push button deployment.  
2 operators trained in a day

# Real life tests

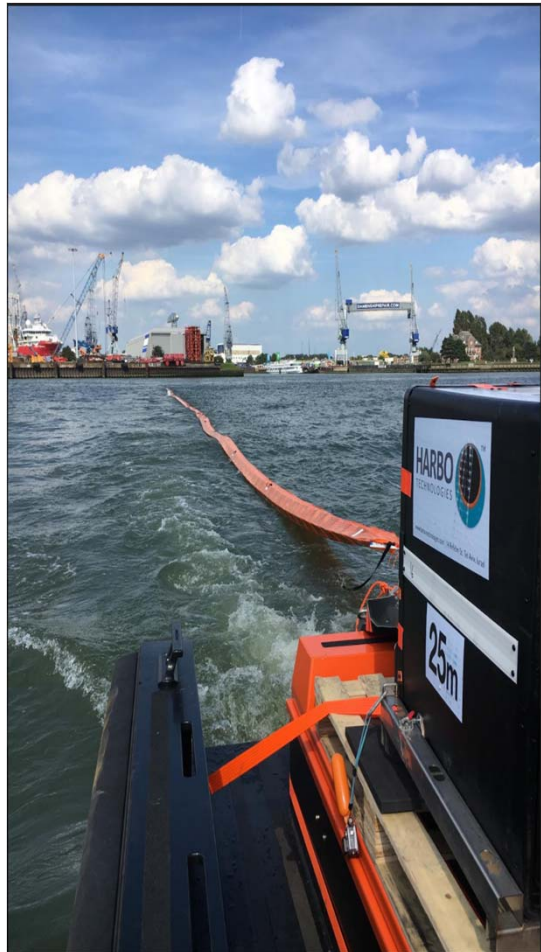

# Port of Rotterdam Test 2017

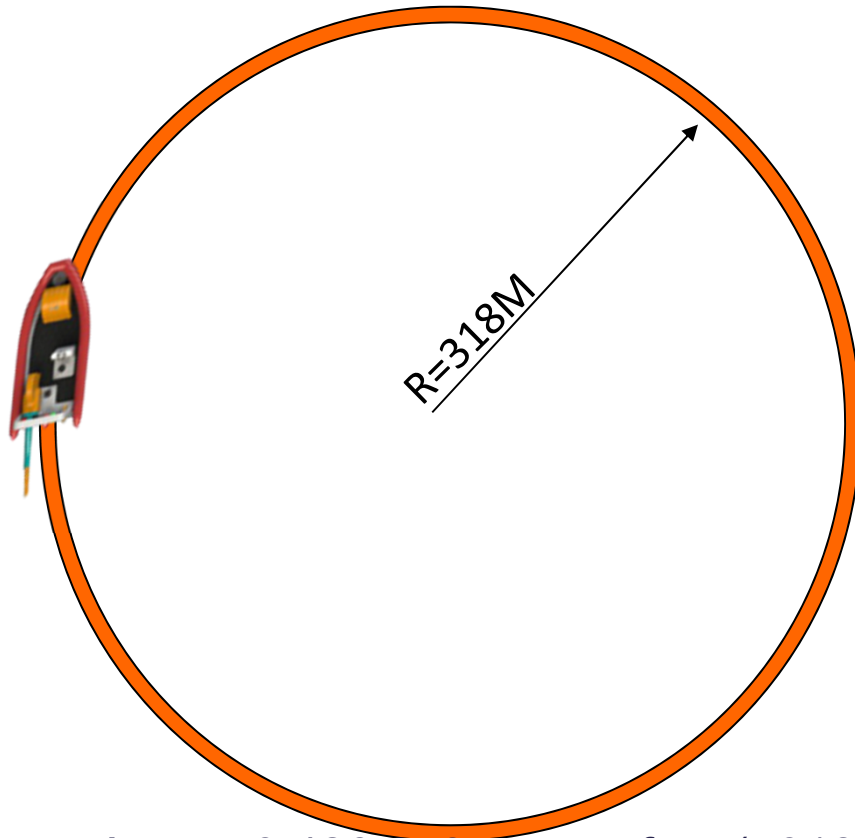

# Port of Rotterdam Test 2017

# Oil contained with a ~6,000 feet (2,000M) circumference boom

Area = 3,426,250 square feet (~318,000 M<sup>2</sup>)

| Oil Thickness | Oil Quantity  |
|---------------|---------------|
| 0.1 mm        | 31.800 ltr    |
| 1 mm          | 318.000 ltr   |
| 10 mm = 1 cm  | 3.180.000 ltr |
